

How to care for GN Faure Tasmanian Timber Products

Always hand wash in warm soapy water (on both sides to avoid warping), wipe with towel then place on rack to dry.

Never soak wooden items in water for an extended period.

Never wash wooden items in the dishwasher.

Avoid storing wooden items in direct sunlight or on shelves or in cabinets near the oven. This may dry them out quickly and can warp or crack the wood.

Never refrigerate wooden items. Wood does not like rapid changes in heat or humidity.

Do not wash your wooden items with harsh detergents of any type.

Regularly oiling your items will help them last longer.
